

FOR IMMEDIATE RELEASE

AUG 2007

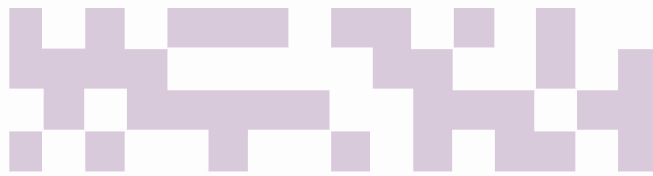

**RE: Hai Kang Life Corporation Limited
Established its flagship R&D and service center in Beijing**

To expedite our development and further enhance research and development ability, Hai Kang Life Corporation (HKLC) is proud to announce the establishment of a new fully functional laboratory in Beijing, primarily serving its research & development of Lab-on-a-Chip (LOAC) as well as areas in food safety testing, veterinary and clinical diagnostics. The Beijing laboratory will be equipped with Bio Safety Level 2 (BSL2) covering specific procedures in handling pathogenic agents and are directed by competent scientists.

Professor Albert Yu, HKLC's Chairman said 'We are excited about opening this first-ever R&D laboratory in Beijing. Housing a team of dedicated scientists with high-caliber instrumentations and technology' Laboratory will cover an area consisting of molecular biology, LOAC, DNA chip and cell culture laboratories. It will be in accordance with national requirement and standards such as ISO / IEC 17025: "Testing and Calibration Laboratories General Requirements for the Competence" and ISO 9001:2000 "quality management system". The laboratory has an outstanding research team, majority of them possessing PhD qualifications. They will fully utilize comprehensive advance equipments which ensure forefront of domestic laboratory standards and ability. Opening the first fully operational research and development laboratory in Beijing signifies our commitment to continue developing Lab-on-a-Chip system into a fully-functional platform that will revolutionize the practice of clinical diagnostics and all other related field.

The laboratory is located at Beijing Economic Technological Development Area (BDA), China's largest scientific and technological research center. BDA is fast becoming the hub of technology excellence housing world class capability in innovative research and its application for economic and social benefit. There are currently over 130 multi-international companies operating in BDA, spanning from pharmaceuticals and medical device manufacturers to telecommunication and biotechnology companies.

HKLC's strength and competitive advantage in the China market is its capability to effectively integrate technology into business culture. HKLC strongly believes that the outcome of its Beijing biotechnology R&D center will have a profound and positive affect on the nation's health system and provide as a pioneering model for the rest of the world to follow. With services scheduled to commence towards the end of 2007, HKLC is set to become a recognized leader in China for providing excellence in analytical solutions for safe food, animal and human health.

About Hai Kang Life Corporation Ltd

The vision of **Hai Kang Life Corporation Ltd** is to be *the world's leading biotechnology company in molecular diagnostics* – growing the Asian biotechnology industry in a globally competitive manner. HKLC was established in 1999 and it is strategically positioned at the hub of Asian biotechnology with the most advanced technologies and a team of world-class molecular biologists.
